SIMILPELLE

La similpelle è un materiale sintetico, utilizzato in alternativa alla pelle naturale. Permette una lavorazione del rivestimento più fluida e lineare, dove le cuciture seguono il disegno del divano lasciando nitide le forme. È impermeabile e si pulisce facilmente, è resistente oltre che leggera.

ARTIFICIAL LEATHER

Artificial leather is a synthetic material, used as alternative to natural leather. It allows a more fluid and linear covering processing, where the stitchings underline the clear shapes of the sofa. It is waterproof and easy to clean, strong and light as well.

VERA PELLE

La "vera pelle", autentica e sofisticata, vive delle sue qualità pure e naturali e, proprio per questo, nel rispetto della forma della pezzatura, la costruzione del rivestimento obbliga a delle cuciture/ribattute in più segnando il divano in alcuni punti. La vera pelle garantisce traspirabilità ed estrema resistenza e durata, oltre ad essere di grande pregio.

REAL LEATHER

Real leather, authentic and sophisticated, pure and natural, in order to respect its size the covering processing requests more stitchings. Real leather grants transpiration, resistance, durability and quality.
